## Assignment -3

## **Python Programming**

Assignment Date	08 October 2022
Student Name	Pratheepraj R
Student Roll Number	73771914150
Maximum Marks	2 Marks

### Question-1:

Write a Python code for Blinking LED and Traffic Light for Raspberry Pi

#### **Solution:**

# **Blinking Of an LED For Raspberry**

import RPi.GPIO as GPIO # Import Raspberry Pi GPIO library

from time import sleep # Import the sleep function from the time module

GPIO.setwarnings(False) # Ignore warning for now

GPIO.setmode(GPIO.BOARD) # Use physical pin numbering

GPIO.setup(8, GPIO.OUT, initial=GPIO.LOW) # Set pin 8 to be an output pin and set in itial value to low (off)

while True: # Run forever

GPIO.output(8, GPIO.HIGH) # Turn on

sleep(1) # Sleep for 1 second GPIO.output(8,

GPIO.LOW) # Turn off

sleep(1) # Sleep for 1 second

## **Traffic Light for Raspberry Pi**

```
import RPi.GPIO as GPIO
import time import signal
import sys
# Setup
GPIO.setmode(GPIO.BCM)
GPIO.setup(9, GPIO.OUT)
GPIO.setup(10, GPIO.OUT) GPIO.setup(11,
GPIO.OUT)
# Turn off all lights when user ends demo def
allLightsOff(signal, frame):
    GPIO.output(9, False)
    GPIO.output(10, False)
    GPIO.output(11, False)
    GPIO.cleanup() sys.exit(0)
signal.signal(signal.SIGINT, allLightsOff)
# Loop forever while
True:
    # Red
    GPIO.output(9, True) time.sleep(3)
    # Red and amber GPIO.output(10,
    True) time.sleep(1)
    # Green
    GPIO.output(9, False)
    GPIO.output(10, False) GPIO.output(11,
    True) time.sleep(5)
    # Amber
    GPIO.output(11, False) GPIO.output(10,
    True) time.sleep(2)
    # Amber off (red comes on at top of loop)
    GPIO.output(10, False)
```
